Summary

Hi, I'm Cornelius Venti (he/him), a Full Stack Developer. I love technology and programming since I was in middle school. I have a passion for programming and solving problems and learning the latest technology.

I graduated from Tanjungpura University with a Bachelor of Computer Science with a graduation date of October 2019. I was graduated with an undergraduate thesis about On Street and Off-Street Car Parking Management System Based on Location-Based Service (LBS) and Google Maps API.

I want to keep learning and growing both my interpersonal and technical skills so that I can strive to be the most successful version of myself. Send me a message if you'd like to connect! I'm always happy to support others

Experience

Full Stack Developer
FWD Insurance

Oct 2020 - Present (1 year 2 months +)

I am responsible to build projects that use by customers and partners. The Tech stack that I am using is Nuxtjs as Frontend and Nestjs as Backend. These were projects that I built:
- Lead Generation Form (Vue.js as Web Component and Nestjs as Backend/Microservice),
- Logger Modules For Microservice (Wiston as Logger Modules and AWS CloudWatch as Logger Service),
- Ryde App Partnership API (Mulesoft),
- Printable Chart/Graph (Chart.js and Vue.js)
- Email/Report Microservice (Nestjs as Backend, Html-pdf as Report Generator and SendGrid as Email Provider)

Staff Development
Satumarket

Feb 2020 - Sep 2020 (8 months)

Built Local E-commerce at Pontianak from scratch using Nuxtjs, Laravel, Flutter within 3 months

Web Developer
Orange Multimedia CV.

Feb 2018 - Feb 2020 (2 years 1 month)

Built three Web Application Systems using Laravel for the local government department in Pontianak.
These were projects that I built:
- SETIL (Letter System Based on Electronic Signatures)
- SIPKD (Regional Financial Management Information System)
- OTR (Online Tax Reporting System)
